Plans for the COCO located on Market Garden Road have been reviewed and cost estimates have been developed.

This estimate is intended to be used for 1391 planning purposes only and has been prepared based on very limited information, where little more than the proposed facility type, its location, and capacities are known or assumed. The typical expected accuracy range for this class estimate are -20% to -50% on the low side and +30% to +100% on the high side.

It is assumed that, for the proposed facility, CH2M HILL will provide the design and construction of the water service and fire hydrants. CH2M HILL will provide a backflow preventor for installation by the interior plumbing contractor. Extension of the 10" water main on Market Garden to accommodate fire protection requirements is included.

Sanitary sewer service is not yet available in this area. CH2M HILL will provide a sanitary sewer service lateral and sanitary holding tank. The tank will be pumped out as needed by CH2M HILL. Cost for regular pumping of tank will not be charged to this facility by CH2M HILL.

The estimates are broken down by both water supply and sewer costs, escalated to the year shown below.

Year	Sewer	Water Service and Supply	Total
2005	\$24,049	\$134,609	\$158,658

This estimate does not include any upgrades to water mains serving the area. It is assumed that adequate capacity of the water system would continue to exist at the time that the project is to be constructed and put into service.
